

Table of Contents

Preface

1. Introduction 1-1

1.1	Cold Climate BMP Surveys	1-1
1.1.1	Telephone Survey.....	1-1
1.1.2	Write-In Survey.....	1-1
1.2	Cold Climate Identification	1-3
1.2.1	Temperature	1-3
1.2.2	Length of Growing Season.....	1-3
1.2.3	Snow Depth.....	1-3
1.2.4	Depth of Freeze	1-3
1.2.5	Moderate Climate Definition	1-8
1.3	Cold Climate Design Challenges.....	1-8
1.3.1	Pipe Freezing.....	1-9
1.3.2	Ice Formation on the Permanent Pool	1-10
1.3.3	Reduced Biological Activity	1-10
1.3.4	Reduced Oxygen Levels in Bottom Sediments	1-11
1.3.5	Reduced Settling Velocities	1-11
1.3.6	Frost Heave	1-11
1.3.7	Reduced Soil Infiltration	1-12
1.3.8	Short Growing Season.....	1-13
1.3.9	High Runoff Volumes During Spring Melt.....	1-14
1.3.10	High Pollutant Loading During the Spring Melt.....	1-14
1.3.11	Other Problems Associated with Road Salt.....	1-15
1.3.12	Snow Management.....	1-15
1.4	Designing Better BMPS for Cold Climates.....	1-15

2. Sizing Criteria 2-1

2.1	Water Quality Sizing Criteria	2-1
2.1.1	Five Steps to Calculating Water Quality Volume	2-2
2.1.2	Base Criteria.....	2-4
2.1.3	Calculating Snowmelt Runoff for Water Quality Sizing.....	2-5
2.1.4	Coastal Regions: Rain-on-Snow Events.....	2-7
2.2	Water Quality Sizing	2-10
2.2.1	Sizing for Rainfall Events	2-11
2.2.2	Sizing for the Spring Snowmelt Event	2-12
2.2.3	Sizing for Rain-on-Snow Events.....	2-14

3. Ponds 3-1

3.1	Types of Ponds	3-1
-----	----------------	-----

3.2	Base Criteria	3-1
3.3	Cold Climate Modifications	3-3
3.3.1	Conveyance	3-3
3.3.2	Pretreatment	3-10
3.3.3	Treatment	3-11
3.3.4	Maintenance	3-14
3.3.5	Landscaping	3-18
3.3.6	Snow Management	3-18

4. Wetlands4-1

4.1	Types of Stormwater Wetlands	4-1
4.2	Base Criteria	4-2
4.3	Cold Climate Modifications	4-2
4.3.1	Conveyance	4-2
4.3.2	Pretreatment	4-3
4.3.3	Treatment	4-3
4.3.4	Maintenance	4-5
4.3.5	Landscaping	4-5

5. Infiltration..... 5-1

5.1	Types of Infiltration BMPs	5-1
5.2	Base Criteria	5-1
5.3	Cold Climate Modifications	5-2
5.3.1	Feasibility	5-2
5.3.2	Conveyance	5-4
5.3.3	Pretreatment	5-5
5.3.4	Treatment	5-5
5.3.5	Maintenance	5-7
5.3.6	Landscaping	5-7
5.3.7	Snow Management	5-7

6. Filtering BMPs 6-1

6.1	Types of Filtering BMPs	6-1
6.2	Base Criteria	6-4
6.3	Cold Climate Modifications	6-5
6.3.1	Feasibility	6-5
6.3.2	Conveyance	6-5
6.3.3	Pretreatment	6-7
6.3.4	Treatment	6-7
6.3.5	Maintenance	6-9

6.3.6	Landscaping	6-9
7.	Open Channels	7-1
7.1	Types of Open Channels	7-1
7.2	Base Criteria 7-2	
7.3	Modifications for Cold Climates	7-3
7.3.1	Feasibility	7-3
7.3.2	Conveyance	7-3
7.3.3	Treatment	7-4
7.3.4	Maintenance	7-4
7.3.5	Landscaping	7-4
7.3.6	Snow Management	7-4
8.	Pollution Prevention	8-1
8.1	Sand (Abrasives) 8-1	
8.1.1	Clean Sand Source	8-1
8.1.2	Street Sweeping	8-1
8.1.3	Operator Training	8-1
8.2	Road Deicers 8-1	
8.2.1	Application Rate	8-1
8.2.2	Alternative Deicers	8-2
8.2.3	Deicer Additives	8-4
8.2.4	Timing of Application	8-4
8.2.5	Modified Spreaders	8-4
8.2.6	Salt or Deicer Storage	8-4
8.3	Airport Deicers 8-4	
8.3.1	Airport Deicer Alternatives	8-5
8.3.2	Limit Application	8-5
8.3.3	Treatment	8-5
8.3.4	Deicer Recycling	8-6
8.4	Snow Storage 8-7

Appendix A: Cold Climate BMP Survey

Appendix B: Stormwater Pond Outlet Designs

Appendix C: Example Snow Storage Design

List of Tables

Table 1	Categories for BMP Modification	Preface
Table 1.1	Cold Climate Design Challenges	1-9
Table 1.2	Applicability of BMPs to Cold Climate Conditions.....	1-16
Table 2.1	Winter Snowmelt	2-3
Table 3.1	Features of a Standard System Pond System	3-2
Table 3.2	Design Guidelines for Pond Inlets.....	3-4
Table 3.3	Design Guidelines for Pond Outlet Structures	3-6
Table 3.4	Treatment Modifications for Ponds in Cold Climates.....	3-11
Table 3.5	Modifications to Skimmers and Trash Racks.....	3-15
Table 4.1	Treatment Allocation for Three Marsh Types.....	4-2
Table 4.2	Features of a Standard Stormwater Wetland	4-2
Table 4.3	Treatment Options for Wetlands	4-3
Table 4.4	Wetland Landscaping Techniques for Cold Climates	4-5
Table 4.5A	Cold Climate Plant Species - Salt Tolerant.....	4-6
Table 4.5B	Cold Climate Plant Species - Non-Salt Tolerant.....	4-7
Table 5.1	Types Infiltration BMPs.....	5-1
Table 5.2	Base Criteria for Infiltration BMPs.....	5-2
Table 5.3	Infiltration of BMP Feasibility Modifications.....	5-2
Table 5.4	Conveyance Modifications to Infiltration BMPs	5-4
Table 5.5	Treatment Modifications to Infiltration BMPs.....	5-6
Table 6.1	Characteristics of Filtering BMPs	6-1
Table 6.2	Base Criteria for Filtering BMPs	6-4
Table 6.3	Conveyance Modifications for Stormwater Filtering BMPs.....	6-5
Table 6.4	Treatment Options for Filtering BMPs in Cold Climates.....	6-8
Table 7.1	Types of Open Channels	7-1
Table 7.2	Base Criteria for Open Channel Systems	7-2
Table 7.3	Conveyance Modifications for Open Channel Systems	7-3
Table 8.1	Characteristics of Deicers.....	8-3
Table 8.2	Airport Deicer Alternatives	8-5

List of Figures

Figure 1.1	Geographic Distribution of Survey Respondents	1-2
Figure 1.2	Types of Organizations Represented by Survey Respondents	1-2
Figure 1.3	Normal Daily Maximum Temperature (⁰ F) for January.....	1-4
Figure 1.4	Mean Length of Freeze-Free Period (Days), i.e. Growing Season.....	1-5
Figure 1.5	Overlay of Maximum January Temperature and Growing Season	1-6
Figure 1.6	Mean Annual Total Snowfall	1-7
Figure 1.7	Importance of Cold Climate Challenges for BMP Design	1-8
Figure 1.8	Influence of Pipe Freezing on Detention Storage.....	1-10
Figure 1.9	Effect of Ice Cover on Flow Through Ponds.....	1-11
Figure 1.10	Effect of Water Temperature on Settling Velocity.....	1-12
Figure 1.11	Infiltration in Frozen Soils	1-13
Figure 1.12	BMPs Recommended in Cold Climates	1-18
Figure 2.1	Increased Water Quality Volume in Cold Climates	2-1
Figure 2.2	Snowmelt Infiltration Based on Soil Moisture.....	2-5
Figure 2.3	Rainfall Distribution for Snowy Months.....	2-8
Figure 2.4	Rainfall Distribution for Non-Snowy Months.....	2-9
Figure 2.5	Annual Runoff Distribution Portland, Maine.....	2-10
Figure 2.6	Water Quality Sizing Criteria.....	2-11
Figure 3.1	Types of Stormwater Ponds	3-1
Figure 3.2	Daylighting Inlet Pipes.....	3-4
Figure 3.3	Over-excavation and Backfilling with Gravel/Sand.....	3-5
Figure 3.4	Submerged Inlet Pipes.....	3-6
Figure 3.5	Proportional Weir.....	3-8
Figure 3.6	Underdrain System.....	3-9
Figure 3.7	Forebay with a Weir System	3-10
Figure 3.8	Minimum 25% Extended Detention.....	3-12
Figure 3.9	Seasonal Pond Operation	3-12
Figure 3.10	Weir Plate.....	3-13
Figure 3.11	Storage to Compensate for Ice Build-Up	3-14
Figure 3.12	Baffle Weir.....	3-15
Figure 3.13	Riser Hood	3-16
Figure 3.14	Alternate Trash Rack Design	3-17
Figure 4.1	Types of Stormwater Wetlands	4-1
Figure 4.2	Pond/Wetland Systems in Cold Climates.....	4-4
Figure 4.3	Wetland/Infiltration System	4-4
Figure 5.1	Seasonal Operation of Infiltration	5-7
Figure 6.1	Types of Stormwater Filtering Systems	6-2

BMP Design Supplement for Cold Climates

Figure 6.2	On-Line Versus Off-Line Filters	6-3
Figure 6.3	Conveyance Modifications to a Stormwater Filter.....	6-6
Figure 6.4	Standpipes Replaced with Weirs	6-7
Figure 6.5	"Indoor" Sand Filters.....	6-8
Figure 7.1	Open Channel BMPs Used in Snow Storage	7-5
